Company Profile

INTEGRATED FREIGHT FORWARDING AND LOGISTICS IN GHANA

Air • Sea • Land • Customs • Storage • Delivery

Tema, Ghana | www.bjhlogistics.com

COMPANY OVERVIEW

Integrated Logistics from Tema

BJH Logistics Services Ltd is a Tema-based freight forwarding and logistics company supporting importers, exporters, project cargo teams, offshore operators, and growing businesses. The company coordinates cargo movement across sea, air, and land while linking freight with customs, storage, documentation, and final delivery requirements.

Operating since 2006

BJH Logistics has delivered integrated logistics support from Tema, Ghana, since 2006. Its service model is designed for customers who need one commercial contact to coordinate multiple stages of a shipment rather than manage each stage separately.

What the company coordinates

Transport and freight	Clearance and control	Specialist support
Sea freight, air freight, road transport, and delivery planning	Customs clearance, document review, examination handling, and release coordination	Project cargo, offshore and ship supply, RoRo, container sales, and cargo insurance support
FCL, LCL, pickup, last-mile delivery, and distribution support	Warehousing, bonded storage options, cargo handling, and inventory support	Import-export licence guidance and specialist shipment coordination

Operating base

The company operates from Tema, Ghana, serving cargo movements linked to local, regional, and international trade requirements. Tema provides direct proximity to Ghana's principal seaport and strong connections to inland distribution routes.

SERVICE PORTFOLIO

Core Commercial Services

BJH Logistics combines freight movement with the operational services required before, during, and after transport. Customers can discuss a single service or a connected end-to-end handling plan.

Service	Scope
Sea Freight	FCL and LCL coordination, port support, documentation, and delivery planning for cargo moving into and out of Ghana.
Air Freight	Booking, customs coordination, pickup planning, and time-sensitive delivery management for air cargo.
Road Transport	Pickup, inland trucking, distribution support, and final delivery where the movement continues beyond the port or airport.
Customs Clearance	Document review, pre-clearance support, examination handling, and release planning for imports and exports.
Warehousing and Storage	Secure storage, bonded options, cargo handling, controlled staging, and inventory support.
Door to Door Shipping	Integrated pickup, freight, customs, and final delivery planning across the shipment path.
Cargo Insurance	Insurance support for shipments requiring protection against transport-related commercial risks.
Import and Export Support	Guidance on documentation, licences, and cargo readiness for cross-border trade.

INTERNATIONAL FREIGHT

Sea and Air Freight Solutions

International cargo requires coordination between bookings, documents, ports or airports, customs processes, and delivery. BJH Logistics brings these stages into one operating plan based on the shipment's route, size, timing, and handling needs.

Sea Freight Services

BJH Logistics supports full-container-load and less-than-container-load movements into and out of Ghana. Services include shipment coordination, port interface, documentation support, customs linkage, storage planning where required, and onward delivery arrangements.

- FCL and LCL shipment support
- Import and export cargo coordination
- 20ft and 40ft container movements
- Port, document, customs, and delivery planning
- Vehicle and rolling cargo support through RoRo service paths

Air Freight Services

For priority and time-sensitive cargo, the company coordinates air freight booking support, customs requirements, pickup planning, and delivery management. The service can be connected to inland transport and other handling requirements.

Route planning information

Information required	Why it matters
Cargo type, quantity, and dimensions	Determines handling, space, and service requirements.
Origin and destination	Defines the transport and delivery path.
Preferred timing	Supports mode and schedule planning.
Linked services	Identifies customs, storage, insurance, or delivery needs early.

CUSTOMS AND COMPLIANCE

Customs Clearance and Documentation

BJH Logistics supports customs clearance for vehicles, general cargo, and containerised cargo. The service connects document review, entry preparation, examination handling, release coordination, and delivery planning.

General cargo at Tema Port

For non-hazardous general cargo arriving in 20ft and 40ft containers, the documented process includes BOE and documentation, customs examination, applicable Ghana Standards Authority requirements, customs duty assessment based on HS code and cargo value, and inland delivery arrangements.

Documents commonly required

Document	Purpose in the clearance file
Commercial invoice	Provides the declared commercial details and value of the goods.
Packing list	Describes package contents, quantities, and packing arrangement.
Bill of lading with telex release	Supports shipment identification and cargo release processing.

Clearance and delivery timeline

The stated clearance and delivery time for the quoted Tema Port service is 3-5 business days after cargo arrival, provided the required documents are available and normal port and customs processes apply.

Important cost basis

Customs duty is charged at cost and depends on the applicable HS code and the value of the goods. Shipping line and port terminal charges are also treated at cost within the relevant quotation.

INLAND LOGISTICS

Transport Storage and Door to Door Delivery

Cargo movement does not end when a vessel or aircraft arrives. BJH Logistics connects port or airport activity with controlled storage, inland transport, distribution, and final delivery requirements.

Road Trucking and Land Transport

The company supports pickup, last-mile delivery, distribution, and inland cargo movement. The documented Tema-to-Accra service includes transport for both 20ft and 40ft containers.

Warehousing and Bonded Storage

Storage services include secure warehousing, bonded options, cargo handling, controlled staging, and inventory support when goods cannot move directly from arrival to final destination.

Door to Door Coordination

Door-to-door service brings pickup, main transport, customs clearance, storage where needed, and final delivery into a connected plan. This is suitable when a shipment requires complete handling rather than separate service bookings.

Connected service flow

Stage	BJH Logistics support
Pickup and booking	Cargo information review, pickup planning, and freight coordination.
Arrival and clearance	Document review, customs coordination, examination, and release planning.
Storage and staging	Warehousing or bonded storage options where required.
Final delivery	Inland transport, distribution support, and handover at destination.

SPECIALIST CAPABILITY

Project Marine Automotive and Trade Support

BJH Logistics provides service paths for cargo and operations that require more than standard freight booking. These services can be combined with customs, transport, storage, and documentation support.

Specialist service	Confirmed service scope
Project Cargo Handling	Support for oversized, specialist, or demanding cargo movements requiring route awareness, staging, and controlled execution.
Offshore Shipping and Ship Supply	Support for offshore operations, vessel requirements, ship spares, provisions, and maritime project coordination.
RoRo Shipping	Roll-on roll-off support for vehicles and automotive cargo, including route, timing, handling, and documentation coordination.
Container Sales	20ft and 40ft container solutions for storage, transport support, and operational use.
Cargo Insurance	Insurance support for cargo that needs protection against loss, damage, theft, and related commercial uncertainty during movement.
Import Export Licence Support	Guidance on licensing requirements, document readiness, and alignment with Ghanaian import-export processes.
Scrap Metal Export Logistics	Commercial and operational coordination for scrap metal export movements.

OPERATING APPROACH

From Consultation to Delivery

The company's process begins with accurate shipment information and carries the movement through planning, execution, monitoring, delivery, and follow-through. This structure helps customers understand what is needed at each stage.

1 Consultation

Review the cargo type, route, quantities, dimensions, timing, and any linked customs, storage, insurance, or delivery requirements.

2 Planning

Arrange the handling sequence around the freight mode, documentation, customs needs, storage requirements, and delivery milestones.

3 Execution

Coordinate cargo movement, handovers, documents, and the connected services required for the shipment.

4 Monitoring

Follow shipment progress, respond to operational issues, and maintain visibility around timing and release points.

5 Delivery and Follow Through

Complete the final delivery stage and use shipment feedback to support future movement planning.

Customers supported

BJH Logistics serves importers, exporters, project cargo teams, offshore operators, vehicle and RoRo customers, and growing businesses that require dependable freight, customs, storage, and onward delivery coordination.

Requesting a quotation

For an accurate quotation, provide the cargo type, quantity, approximate dimensions, origin, destination, preferred timing, and any customs, storage, insurance, or delivery support required.

CONTACT

Start a Logistics Discussion

Share the shipment details at the beginning so the team can identify the right combination of freight, customs, storage, transport, insurance, and delivery support.
